ABOUT ME

I combine a strong foundation in programming, design, and marketing to create user-focused digital solutions. With several years of hands-on training at 1337 Coding School, I've developed a solid technical skillset that supports both software development and strategic marketing execution. My experience includes working as a Web Developer at OCP Maintenance Solutions, a Technical Marketing Specialist at AJICOD, and a Telemarketer at HAModernHomes. I thrive in roles where I can bridge technical and creative disciplines to deliver impactful results.
